DIRECTIONS.

IF a Yard of *Tape* cost 5 Farthings, or 1 Penny 1 Farthing, What will 49 cost?—Turn to the *Table* of 5 Farthings, and on the Top of the Column, under N. you will find 49, against which you will find 5s. 1d. 1q.

Example. 2.—I would know, what [112lbs.] of Sugar will come to at 6d. a pound?

Look on the Top for 6d. you will find	<i>l.</i>	<i>s.</i>	<i>d.</i>
The <i>Great Hundred</i> at the Bottom [112lbs.]	2	16	0
The <i>Gross</i> , which is [144]	3	12	0
The <i>Wey</i> , which is [256lbs.]	6	8	0
The <i>Feet</i> in a <i>Rod</i> , which are [272]	6	16	0
The <i>Days</i> in a <i>Year</i> , which are [365]	9	2	6

And so much each comes to.

Our readers are particularly desired to observe, that there is a great difference in many cases between Discount and Interest, which has not been sufficiently attended to.—E. G. Suppose 100*l.* is payable 12 months hence, and a Discount of 5 *per cent* is agreed to be made for present payment, as between the Debtor and the Creditor, this would be equal to an Interest of 5*l.* 5*s.* 3*d.* and 3-19*ths*; but suppose a Money dealer or Banker to discount such a Bill of 12 months, he could only deduct 4*l.* 14*s.* 9*d.* (supposing no account to be made of the Fraction,) because 95*l.* 5*s.* 3*d.* with the Interest of 12 months, would just amount to 100*l.* As this difference would amount to a considerable sum in large money concerns, it is of great importance to notice it in this place.

At 1 Farthing.

Prevention of Death, from various causes, as recommended by the Humane Society.

CAUTIONS.

1. Never to be held up by the feet.
2. Not to be rolled on casks, or other rough usage.
3. Avoid the use of salt in all cases of apparent death. *But warm flannel, lightly sprinkled with spirits, is strongly commended.*

Restoration of Life.

What thou doest—do quickly.

The apparently Drowned.

1. Convey carefully the body, with the head raised, the nearest convenient house.
2. Strip and dry the body; clean the mouth and nostrils and place in a moderate degree of heat where the air pure and free.
3. Young children between two persons in a warm bed.
4. An adult—lay the body on a blanket or bed, in warm chamber, in winter;—To be exposed to the sun in summer.
5. It is to be gently rubbed with flannel, sprinkled with spirits;—a heated warming-pan, covered, lightly move over the back and spine. Bottles of hot water to be applied to the bottoms of the feet, joints of the knees, and the arm-pits. A healthy person may lay on the side; the warmth of a bakehouse, brewhouse, or any moderate heat will be of use, or the friction of the hand.
6. To restore breathing—introduce the pipe of a pair of bellows (when no apparatus) into one nostril; the other with the mouth closed; inflate the lungs, till the breast be little raised; the mouth and nostrils must then be let free repeat the process till life appears.
7. The breast to be fomented with hot spirits—if no sign

of life appear—the warm bath:—hot bricks, &c. applied to the palms of the hands, and soles of the feet.

8. Electricity early employed by a medical assistant.

Intense Cold.

Rub the body with snow, ice, or cold water; cloths wet with cold water.—Restore warmth, &c. by slow degrees in a room without fire; and, after some time, if necessary, the plans to be employed for the resuscitation of drowned persons.

Suspension by the Cord.

1. A few ounces of blood may be taken from the jugular vein, and cupping-glasses may be applied to the head and neck; leeches also to the temples.

2. The other methods of treatment, the same as recommended for the apparently drowned.

Suffocation by noxious Vapours or Lightning.

In a cool place and free air, strip the body, and throw cold water repeatedly on the face from buckets, &c. drying the body at intervals.—If the body feels cold, employ gradual warmth; and the plans for the drowned. Do not shelter under trees to avoid lightning.

Intoxication.

The body is to be laid on a bed, &c. with the head a little raised; the neckcloth, &c. removed—obtain immediately *medical assistance*, as the modes of treatment must be varied according to the state of the patient.

General Observations.

1. On signs of returning life, a tea-spoonful of warm water may be given; and, if swallowing be returned, warm wine or diluted brandy—to be put into a warm bed, and if disposed to sleep, will generally awake restored to health.

2. The plans above recommended are to be used for three or four hours. It is an absurd and vulgar opinion to suppose persons are irrecoverable because life does not soon make its appearance.

3. Electricity and bleeding never to be employed, unless by the direction of the medical assistants.

If the Resuscitative Process be immediately employed, an immense number of lives will be restored.

To prevent ill-effects from the Dress catching Fire.

The by-stander or sufferer should instantly raise the cloaths above the head, and then rolling or laying upon them on the floor, or forcing them entirely off, the flames always tending upwards, they should try to preserve the face and bosom, where is the greatest danger.
